

TOPFLIGHT INNOVATIONS

Rock. Paper. Green.

Go green with labels that further your brand’s sustainability efforts. Topflight labels printed on stone paper are made without the use of trees, water, or bleach. The material’s clean production process does not emit toxic air and is chlorine free, acid free, and safe for the environment.

Since the material is both durable and water-proof, it’s ideal for consumer products and outdoor applications. And, price and performance compare favorably with film.

- ✓ Tree-free
- ✓ No water consumption during manufacturing/processing
- ✓ No bleaching chemicals
- ✓ No air pollution
- ✓ Virtually tear-proof (self-destruct feature)
- ✓ Silver cradle-to-cradle certification
- ✓ Printable and writeable
- ✓ Lower energy consumption compared to paper or film production
- ✓ Made from calcium carbonate derived from limestone, which is waste material in existing quarries.
- ✓ Can be recycled with paper or plastic products.

High performance eco-paper can be recycled with traditional paper or plastic.

Topflight tests confirmed that our labels are both water-proof and durable.

What makes one ton of paper?							
	 Trees	 Waste	 Water	 Bleach	 Stone	 Additive	 Energy
100% Virgin Pulp	23	0	14,000 Gallons	Yes	~25%	0	36,000 BTU
100% Recycled Pulp	5	2 Tons	7,000 Gallons	Yes	~25%	0	21,600 BTU
100% Stone Paper	0	0	0	No	80%	<25% Resin	18,000 BTU
